qwikWare™ Product Family

CONFIGURABLE

SCALABLE

AFFORDABLE

Are you considering ways to meet your tracking needs with mobile computing? Do you want to increase the speed, accuracy and availability of the data you need to run your daily operations? Welcome to the qwikWare™ Application Suite of products from Csoft...a suite of configurable tracking products that are designed to increase your company's productivity by improving accuracy of your data collection. The qwikWare™ approach provides great flexibility at a reasonable price and helps you automate your tracking needs without the normal constraints of traditional tracking software while achieving high performance and ease of use. qwikWare™ applications are designed to grow with your company's changing needs as our software modules are very configurable and run on all versions of Microsoft SQL Server. qwikWare™ applications also allow you to choose from a list of handheld devices that support both batch and real-time RF data capture. Come visit our website (listed below) or contact us today so we can help you make your business more efficient with qwikWare™ products from Csoft.

FEATURES

- Configurable Hand-Held choices, which support Symbol and Windows Mobile Devices. For a list of supported devices visit our website.
- Configurable form engine for customizing forms and fields on both the PC and Mobile Computer.
- Configurable query engine for data review and printing on both the PC and Mobile Computer.
- Configurable report writing through Crystal Reports™.
